

SUMMARY

Adept **full-stack web developer** with extensive expertise in creating robust **React.js applications** and enhancing development processes at Funeral Directors Life (FDIC). Committed to crafting scalable web solutions using technologies such as **Next.js, Strapi, and PostgreSQL**, while effectively managing workflows with tools like **Jira** and **Git**. Dedicated to producing user-centric applications that optimize efficiency and performance in a dynamic development environment.

EDUCATION

B.S. in Computer Science | Minor Business Administration

Graduated: May 2025

Hardin-Simmons University | Abilene, TX

- Acquired knowledge through courses in Web Technologies, Computer Data Structures, Database Systems, and UI/UX.
- **Achieved certifications** from SoloLearn for Java in January 2021 and Python 3 in November 2019

INTERSHIPS EXPERIENCE

Development Operations Intern

Sep 2022 - Oct 2023

Funeral Directors Life (FDIC) | Abilene, TX

- Developed and maintained software applications using **React.js**, achieving minimal QA returns through rigorous code reviews and testing, improving application reliability.
- Streamlined workflows by leveraging **Jira, Confluence, and Git/Bitbucket**, reducing ticket resolution time by 20%.
- Documented features and issues, creating personal documentation that enhanced team knowledge sharing and process efficiency.
- Collaborated with cross-functional teams and engaged in customer interactions, honing communication skills and ensuring user-focused solutions.

TECHNICAL STACK

Programming Languages:

JavaScript || Python || Java || Swift || TypeScript || C++

Web Development:

HTML || CSS || React.js || Next.js || Bootstrap || Tailwind CSS || State Management || Node.js || Strapi || WordPress || WooCommerce || PostgreSQL || MySQL || SQL || NoSQL || Stripe || Resend || Go || PHP

Tools:

Git || GitHub || Heroku || Atlassian JIRA || Confluence || Bitbucket || Plotly || Asana || Dialogflow || Dark Sky API || Unit Testing || Test Cases || Supabase

Deployment:

VPS || Hostinger || Vercel || AWS || Render

Methodologies & Soft Skills:

Agile || MVC architecture || Collaboration || Communication || Technical Documentation

PROJECTS

NEMT Billing

Jan 2024 - Present

<https://nemtbilling.com/>

- Developed a secure billing system for non-emergency medical transport using **Next.js** and **Strapi**, integrating **Stripe** for payments, **Resend** for email notifications, and **React Context** for user authentication to streamline billing processes and enhance data protection.
- Deployed the system on **Vercel (frontend)** and **VPS (backend)**, utilizing **Tailwind CSS** for consistent styling and conducting unit testing to ensure reliable performance under varying conditions.

My Sweet Emporium

Jan 2024 - Present

<https://mysweetemporium.com/>

- Building a **WordPress/WooCommerce** e-commerce platform to sell exotic and international candies, featuring a modern design, efficient inventory management, and secure payment processing (in development).
- Implementing responsive design and unit testing to ensure a reliable and user-friendly shopping experience upon launch.

Personal Portfolio

Aug 2023 - Present

<https://www.kingsharif.live/>

- Built a responsive portfolio website using **Next.js, Tailwind CSS, and TypeScript**, focusing on clean design and user-friendly navigation to effectively showcase my projects.
- Deployed on **Vercel**, incorporating dynamic project displays and contact integration to enhance professional outreach and networking opportunities.

Come And Take It Collectibles

Aug 2022 - Oct 2022

<https://comeandtakeitcollectibles.com/>

- Created a **WordPress/WooCommerce** e-commerce platform for rare coins and collectibles, integrating secure payments, **SEO** optimization, and detailed product categorization to enhance user experience.
- Documented setup and customization processes to improve maintainability and support future scalability.
